SUSTAINABLE PACKAGING POLICY

SUSTAINABLE MANAGEMENT

PS-ST-PL02

1. INTRODUCTION

From its purpose of nourishing the future, caring for the world; Multi X (hereinafter the Company) places sustainability at the center of the business, developing plans and goals whose purpose is to offer its customers a nutritious, efficient, safe and affordable food, with low environmental and social impacts.

It is in this context that the Company has developed this Sustainable Packaging Policy, whose objective is to contribute to the commitment with its customers and consumers to deliver safe, innocuous and high-quality products, through the establishment of packaging guidelines.

2. SCOPE

The scope of this policy extends to all products packaged and marketed by Multi X. It is for this reason that the present document will be in knowledge of suppliers.

3. OBJECTIVE

The company promotes the use of sustainable materials in packaging, as long as product characteristics such as food safety, innocuousness, quality, and competitiveness are assured.

The objective of this policy is to advance toward sustainability in packaging. In this way, the company declares the following *commitments*:

- The packaging used by the company complies with the legal regulations in force in Chile and in the countries and entities where the product is marketed, such as the regulations of the FDA (Food and Drug Administration), the EU (European Union), and the EAC (European Conformity) certification, in order to comply with its primary commitment: to take care of food safety, product safety, and quality.
- The company seeks efficiency in using space and packaging materials, generating improvements in environmental qualities such as water use, the carbon footprint of product transportation, and contributing to the circular economy.
- The Company strives to use materials obtained in socially responsible ways, with clean production technologies and good labor and environmental practices.
- Multi X promotes the use of packaging materials from recycled materials.
- The Company supports the replacement of single-use materials in cases where product characteristics allow it.
- Promotes the value of our packaging, through easy-to-understand labels, using international standards.
- Works on innovation and packaging development with a sustainable approach within the company.

4. RESPONSIBILITIES

The Company is committed to provide the necessary resources to implement the Packaging Policy and achieve the proposed objectives. Likewise, it will ensure that internal regulations are consistent with the guidelines of this policy.

Through the Quality Assurance Department, the Company will be responsible for ensuring that the packaging complies with the requirements in terms of safeguarding the safety, food safety and quality of the product throughout its useful life.

Through the New Markets and Products Subdivision and in accordance with the provisions of this policy, the Company will advance in sustainable packaging, taking into account market preferences.

Through Sourcing Management, the Company will seek proposals for sustainable packaging materials that are aligned with this policy.

sustainable packaging options that comply with the provisions of this policy.
